EDUCATION

B.Sc in Computer Science, McMaster University, Hamilton, ON

Sept 2023 – 2027

- **Academics:** McMaster Award of Excellence (\$3,000 – Received for a final admission average in the top 10% of Faculty)
- **Relevant Courses:** Intro to Programming, Intro to Computational Thinking, Data Structures and Algorithms, Software Development, Linear Algebra, Discrete Mathematics I and II, Computer Architecture, Operating Systems, Computer Graphics, Linear Optimization.

Green Dale International School, Dhaka, Bangladesh

Aug 2013 – Aug 2023

- Completed O Levels with 8 subjects (Mathematics, Additional Mathematics, Physics, Chemistry, Accounting, English, Bengali, Computer Science) with A* in all of them under Cambridge Examination Board, UK
- Completed A levels with 3 subjects (Mathematics, Physics, Chemistry) with A* (above 90%) in all of them under Cambridge Examination Board, UK

EXTRACURRICULAR AND PROFESSIONAL EXPERIENCE

Application Developer CO-OP, Commercial Banking and Payment Technology, CIBC

May 2025 – Aug 2025

- **Documentation Support (Excel):** Improved and maintained Excel-based documentation and tracking so my team and other teams could document code changes faster and more consistently
- **Finance Support (Excel):** Helped the finance team cross-check expense records and resolve mismatches, building stronger hands-on Excel skills
- **International Payments (Team Project):** Supported a 2-month project to simplify international B2b payments; contributed code, coordinated meetings (agenda, notes, follow-ups), and shared feedback on progress from an early-career user perspective.
- **Multi-Factor Authentication Research:** Researched MFA options, compared trade-offs (user steps, security considerations, cost, and integration effort), and presented a recommendation to the project lead.
- **Resource Management Tool (Solo Project):** Planned a web-app replacement for a complex Excel-based RMT; produced documentation and a React.js demo UI plus a proposed backend plan using Spring Web with PostgreSQL; handed off due to approval delays near the end of term.
- **Spring Boot + QA Prep:** Built Java Spring Boot code against a provided H2 dummy database for another department and reviewed/documented an existing internal project to prepare it for QA handoff.

Application Developer CO-OP, WISE, Wealth Management Technology, CIBC

May 2024 – Aug 2024

- **Java Development and Spring Framework:** Gained hands-on experience in Java development, focusing on the Spring Framework
- **Project Management and Solution Development:** Developed a comprehensive Java-based solution to streamline error code management across multiple applications, enhancing operational efficiency.
- **Web Application Development:** Created a Spring Boot-based web application with advanced search and file management capabilities.
- **Cross-Functional Communication:** Facilitated communication between the WISE team and the Standard Policy team, ensuring smooth integration of new policy changes.

Version Originale, Dhaka, Bangladesh**Jan 2022 – Sep 2022**

- Worked for start-up clothing brand upon its initial founding to support business operations
- Assisted in the creation of several early clothing designs and made critical decisions for the company
- Built up the company's marketing and operational strategy, putting these into action soon after
